

Mudassir Iqbal

Professional Skills Trainer

A 8-week online course designed for all PMP Aspirants, by taking out the guesswork from your quest towards the Ultimate Goal:

The PMP Certification (Project Management Professional)

This Step-by-Step blueprint is designed to help you achieve your Ultimate Goal!

2-4 hours of pre-recorded videos covering topics in PMBOK ver 6 in great depth

The videos will be released on every Friday of every week around 18.00 GMT. This will not only help you understand the topics at your own pace but these can be used for future references and work as a quick guide whenever required

'ONE-ON-ONE CALL SESSION' after completion of 4th module.

I personally believe that every student is unique; hence the 'one size fits all' technique usually doesn't work optimally. So, we need to touch base to see where you are standing and if you require any additional facilitation to make sure that we are good to go.

Two 45 minutes 'LIVE GROUP COACHING' calls on Monday and Saturday

These two sessions per week are designed to answer your queries and to go in details of complex topics to make sure that you understand the chapter topics thoroughly.

2-5 Final Exams

This will make sure that after 7 weeks of diligent efforts, you ready to take the PMP Certification Exam. These exams will test your knowledge of project management, as well as mentally prepare you for the final exam. Using this, you can craft your own strategy or (build upon mine) on how to tackle the certification exam and succeed.

PMP Exam Simulator with more than 1200 Questions

Although the complete course offering is built on the in-depth research and after many a month refinement of ideas, this is one of the most important milestone for you.

Every KA will have more than 100 question to help you clear up your understanding and prepare you for Finals. The simulator is designed to test your reediness for exam using same simulation pattern of PMP exam

\$ 397
